

BELIEVERS INK TATTOO AFTERCARE

9433 US HWY 301 S
RIVERVIEW, FL 33578
(813) 374-2137

Thank You for coming to Believers Ink!
We hope you enjoyed your experience with us!

If we wrapped your tattoo with saran wrap or a Dri-lock bandage, please try to leave it on until you get home.

When you get home and take the saran wrap off, you will see a 'slime'.

Take a CLEAN dry paper towel and wipe it off, hard enough to get the 'slime' off completely. Do not be afraid to wipe your tattoo hard enough to get the slime off.

Put a new thin coat of A&D ointment on, leave it on for 15 minutes, then with a new clean dry paper towel wipe it in the same manner again.

You will need to repeat this process for one (1) full hour.

If you continue to see a seepage, continue the same process one (1) more hour.

After you repeat for one (1) full hour you will put on a thin coat of A&D ointment and leave it on.

You will need to put on a thin coat of A&D ointment at least three times a day for the next two to three days. After that, you may, if you choose to, switch to a lotion like Lubriderm, just make sure there is no perfumes or dyes in the lotion. You may also continue to use the A&D ointment. You must use either lotion or A&D ointment for a total of 10 days.

You may take showers, just make sure that you put a thick coat of vaseline or A&D ointment on so the water beads off. When you get out of the shower make sure to wipe it with a clean dry paper towel and apply a new thin coat of A&D ointment. No baths allowed!

DO NOT go swimming or soak your tattoo until it heals, for at least 7 to 10 days.

During the healing process your tattoo may begin to itch.

DO NOT ITCH OR SCRATCH YOUR TATTOO!

If you have any trouble with your new tattoo, or if you have any further questions, please feel free to call or stop by anytime. You can also find these instructions on our website:
